

California Orthopaedic Association

The California Orthopaedic Association (COA) focuses on both physician and practice needs to serve the orthopaedic community. GO Partners is pleased to announce that the COA has endorsed our organization for EMR, Practice Management and Billing Solutions. The California Orthopaedic Association has 2,100 members and provides high quality services to the community. The COA mission is to protect Orthopedists' rights to practice medicine by monitoring and taking an active role in legislative or regulatory issues impacting on orthopaedic surgeons and their patients. The COA maintains a liaison with carriers/bill review companies (private, Medicare, Workers' Compensation, Medi-Cal) to routinely discuss orthopaedic billing problems. Billing tips are published in the newsletter. Additionally, the association works with nationwide actuarial firms who have developed orthopaedic clinical practice guidelines in an effort to change those guidelines which do not represent sound orthopaedic care. We are pleased to offer COA members a 10% discount and free practice analysis.
