

FOR IMMEDIATE RELEASE

GO PARTNERS ANNUAL RETREAT SETS GREAT TONE FOR 2009

Branson, MO- -September 9, 2008- GO Partners hosts annual retreat in Branson, MO.

Each year, GO Partners renews its' commitment to providing ongoing educational opportunities, by hosting an annual corporate retreat. Our services and solutions for the medical practice industry start with each employee's commitment to stay abreast of regulatory changes in coding and compliance, the latest in technological advances, practice management and benchmarking, as well as a corporate culture renewal of our 'Signature Service'.

"We spend a considerable amount of time and energy each year reinvesting in our #1 asset – our staff and their skill sets. So, while we call it our annual 'retreat' – it generally is *anything but*" says Gina Volmert, President of GO Partners "We know that our surgeons expect us to know their business better than anyone else... so our yearly retreats focus on learning the latest data and having experts, such as Zupko & Associates, spend a day with our coding and billing staff to review coding rules and regulations and strategies to motivate reimbursement. We also focus on building communication skills, problem solving, software navigation and utilization of systems, teambuilding – and most importantly the effect that our role has on the physician's bottom line."

The staff arrives each year at the retreat location and sessions generally start that same evening, commencing each morning at 7:00am – and end late in the day including Saturday and Sunday. Although the hours are long and strenuous – each employee comes back with a greater skill set, a more fully developed knowledge of the industry and our clients' needs.

Expanding our retreat agenda this year, we included several of our client physicians: Dr. Jack Pennington and his practice manager Joan, Dr. J. Mandume Kerina, and Dr. Luga Podesta and his practice manager Pam. Our physicians participated in an open discussion about their ever changing practice and daily challenges of practicing medicine. They also discussed the needs and details of their practices, followed by a question and answer session. The physicians were also invited to attend all other sessions as an opportunity for additional education on a variety of topics.

"This reinvestment of our dollars is our edge over the competition – when our doctors call upon us for answers, we know that we are the best educated and informed to provide the right solutions" Gina Volmert indicated.
